

CAPSTONE EVR

Powered by Mazree

Capstone Health Alliance delivers value and savings to our Members through **strategic partnerships with leading Suppliers**. Partnering with Mazree, Capstone enhances our equipment value recovery (EVR) capabilities and provides innovative solutions to our Members.

Partnership Benefits

Streamlined Asset Management

Mazree's asset disposition services offer Capstone Members a tailored solution for efficiently managing surplus or retired medical equipment. From assessment to secure disposal, Mazree ensures a process that aligns seamlessly with Capstone Members' unique needs, optimizing resource utilization and space management.

Enhanced Financial Returns

Capstone Members can capitalize on Mazree's industry expertise in remarketing and resale to maximize financial returns on retired assets. Through Mazree's targeted approach and extensive network, Members can unlock the total value of their surplus equipment, providing an additional revenue stream that can be reinvested in the healthcare ecosystem.

Elevated Environmental Responsibility

Capstone and Mazree are committed to the shared value of prioritizing sustainability in healthcare. Utilizing Capstone EVR demonstrates environmental responsibility through responsible recycling, resale, and donation practices. These practices align seamlessly with the Capstone values, contributing to a greener and more socially responsible healthcare industry.

Advanced Software & Transparent Reporting

Mazree's advanced, user-friendly software offers Capstone Members a seamlessly integrated solution with tailored, transparent reporting and real-time updates. Automated workflows streamline operations, while the redeployment portal centralizes asset management, and the analytics capabilities empower data-driven decision-making, ensuring Members are audit-ready, and facilitate strategic planning.

To learn more about how Capstone EVR can benefit you, simply email Mazree's Tyson Zullo at tyson@mazree.com and CC your Capstone Region Manger.
